

# Onshore student sentiment tracker

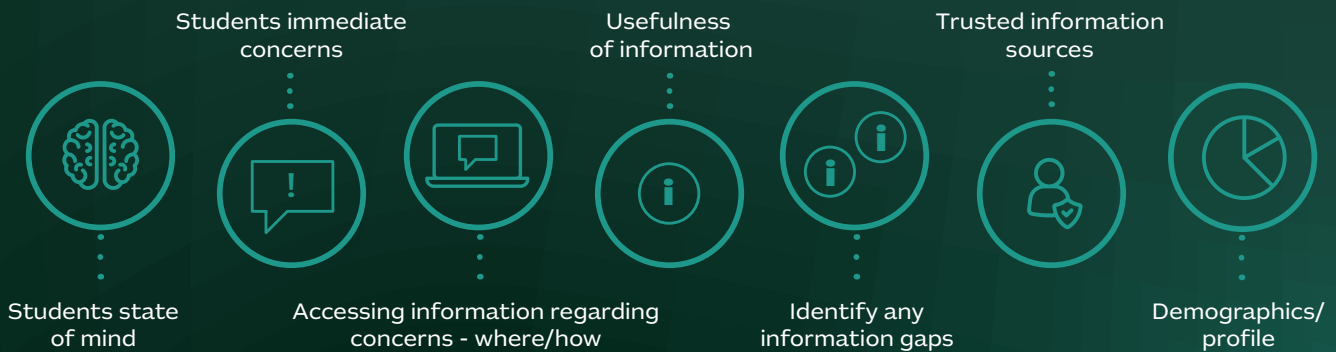

Australian Government

## Project objective

1. To better understand the specific issues concerning international students in Australia, and to identify where they are getting information from, so that we can better target our responses.
2. To provide the report audiences with practical insights to help them improve their international student services.
3. To undertake this endeavour in such a way as to demonstrate our care and concern for international students' wellbeing and their viewpoints.
4. To establish a regular gauge of sentiment so that we can track through the response and recovery of the current crisis, and into the future beyond.

## The lines of enquiry

## Project partner

## Promotion Partners

Austrade is going to use its network for the promotion of the survey. The following channels will be used:

1. Austrade owned communication channels
2. Other Commonwealth Government agencies' owned channels
3. Student facing organisations
4. Peak bodies
5. Other external stakeholders

## Key Deliverables

1. An overall report to inform government and stakeholders' policies on best utilisation of resources to respond to, inform and best assist international students in Australia.
2. A summary comparison of individual states, locations or territories against national results for participating bodies.
